## Time Problems

1. Cara took her dog for a 45 minute walk, then went to the mall for $21 / 2$ hours. If it was 11:35 A.M. before she took her dog for a walk and went to the mall, what time was it when she finished? Show your work.
2. It takes Rita 25 minutes to bake a pizza. Rita must bake 4 pizzas for a party she is having. Rita can only bake one pizza at a time. If she starts baking at 2:40 P.M., what time will she be done making her pizzas? Explain how you solved this problem.
$\qquad$

3a. Suppose Rita gets a new oven and now it takes her only 15 minutes to bake a pizza. If Rita starts baking at 1:40 P.M. how many pizzas can she bake if she must be finished by 4:10 P.M.? Show your work.

3b. With Rita's new oven, will she be able to bake 8 pizzas in 3 hours? Explain your reasoning.
